RE: Appraisal Information Export Transfer Layout Files

Dear Valued Clients,

We previously provided notice of an **Appraisal Information Export** layout update in R51 for the legislative changes, new exemptions affecting PACS, and HB 9 support.

This notice indicates that additional changes were required, and we are updating our **Appraisal Information Export** layout to add fields for the HB 1399 Animal Feed exemption. These changes are cumulative; the latest layout includes all previous changes.

PACS-TX Release R51.3

Targeted for June 11

- HB 1399 11.162 Animal Feed Held for Sale at Retail
 - **FEED**
 - Special Exemption

These changes will go into effect with PACS-TX version 8.51.3, in the release that is targeted for **June**. The *Owner/Agent export layout* has not changed, but the version has been updated to match the *Appraisal Information Export layout* version. Documentation has been included with this communication.

What do I need to do?

In preparation for this change, the new layout version 8_0_34 included with this communication needs to be provided to all entities for which you currently send appraisal export and/or owner information accessed through the **File > Export > Appraisal Information** menu path. Any third-party vendors, i.e. software providers that utilize the exports, will also need to be notified.

Interested parties might include:

- **CADs using PACS to generate the Appraisal Information Export**
- **Collection offices separate from the CAD (Non-Shared) but using PACS**
- **Collection offices importing from a CAD using PACS**
- **Vendors supporting Collection offices importing from a CAD using PACS**

If you have any questions or concerns, please do not hesitate to contact *Harris Govern Client Services*. Email: PACS-Support@harriscomputer.com

Sincerely, PACS-TX Product Team
